

Appendix A

Air Quality and GHG Modeling Worksheets

CVSan - Alameda County, Winter

CVSan
Alameda County, Winter

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Light Industry	0.50	1000sqft	0.01	500.00	0
Industrial Park	13.14	1000sqft	0.30	13,140.00	0
Parking Lot	55.00	Space	0.49	22,000.00	0
City Park	0.50	Acre	0.50	21,780.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	63
Climate Zone	5			Operational Year	2022
Utility Company	Pacific Gas & Electric Company				
CO2 Intensity (lb/MW hr)	641.35	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use -

Area Mitigation -

Water Mitigation -

Stationary Sources - Emergency Generators and Fire Pumps - 2kW SSO/ER Generator (CARB Compliant), 4 hours testing monthly, max 8 hour outage occurring.

Demolition -

CVSan - Alameda County, Winter

Table Name	Column Name	Default Value	New Value
tblStationaryGeneratorsPumpsUse	HorsePowerValue	0.00	2.00
tblStationaryGeneratorsPumpsUse	HoursPerDay	0.00	8.00
tblStationaryGeneratorsPumpsUse	HoursPerYear	0.00	56.00
tblStationaryGeneratorsPumpsUse	NumberOfEquipment	0.00	1.00

Environmental Professional Statement:

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in § 312.10 part of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Destiny S. Hazra, Senior Scientist
Site Assessor/Environmental Professional

Senior Project Manager/Senior Geologist

PHASE I ENVIRONMENTAL SITE ASSESSMENT
 Caltrans Storage Yard
 21195 Center Street
 Castro Valley, California 94546

1.2 Findings and Conclusions Summary

Cardno ATC has performed this Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E 1527-05. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the property, except for the following:

FINDINGS AND CONCLUSIONS SUMMARY						
Report Section	Further Action?	De Minimis Condition	Recognized Environmental Condition (REC)	Historical REC	ASTM Non-Scope Condition	Description
4.0	User Provided Information	No				
5.1.1	Federal Database Findings	No				
5.1.2	State and Tribal Database Findings	No		X		See Note 1 below .

7.0	Interviews	No				
8.1	Asbestos-Containing Material (ACM)	No			X	Given the construction dates of the property improvements, prior to any demolition or remodeling, Cardno ATC recommends that a comprehensive survey be conducted.
8.2	Radon	No				
8.3	Lead in Drinking Water	No				
8.4	Lead-Based Paint (LBP)	No			X	Given the construction dates of the property improvements, prior to any demolition or remodeling, Cardno ATC recommends that a comprehensive survey be conducted.
8.5	Mold Screening	No				
8.6	Additional User Requested Conditions	No				

Note 1: The property is listed as a leaking underground storage tank (LUST) site within the state records searched by Cardno ATC. In January of 1989 one 1,000-gallon gasoline UST and one 260-gallon diesel UST were removed from the property. During tank removal activities, three soil samples were collected and analytical results identified 1.7 parts per million (ppm) total petroleum hydrocarbons as gasoline (TPH-g), 2,100 ppm total petroleum hydrocarbons as diesel (TPH-d), and non-detect for benzene, toluene, ethylbenzene and xylene (BTEX). During subsequent site

investigation activities conducted between January of 1990 and February of 1991, 14 soil borings were advanced in the vicinity of the former USTs and dispenser area to access the vertical and lateral extent of soil contamination. A monitoring well (MW-1) was also installed near the southeastern extent of the contamination plume. In September of 1992, over excavation of approximately 391 tons of contaminated soil was completed in the vicinity of the former USTs and dispenser area. Subsequent soil samples collected after over excavation activities were complete identified 54 ppm TPH-g, 3.74 ppm TPH-d, and non-detect for BTEX. Three additional monitoring wells (VW-1, VW-2, and VW-3) were installed on September 28, 1992 to access impacts to groundwater. Groundwater samples analyzed between October of 1994 and March of 1996 were non-detect for TPH-g, TPH-d, and BTEX during all sampling events, except for low levels of BTEX detected during the last quarter of sampling in March of 1996. Groundwater flow at the property was reported to the southwest. According to the Fuel Leak Site Case Closure Summary issued by the Alameda County Environmental Health Services (ACEHS) on June 25, 1997, 54 ppm TPH-g, 3.74 ppm TPH-d, 0.58 ppm ethylbenzene, and 0.226 ppm xylene remain in the soil in the vicinity of the former UST pit and dispenser area. In addition, 1.9 parts per billion (ppb) benzene, 3.1 ppb toluene, 1.3 ppb ethylbenzene, and 6.9 ppb xylenes exist within groundwater at the site as of March 1996. According to ACEHS, the corrective actions performed protect public health for the current land use, however if land use changes are proposed, corrective actions should be reviewed. No further actions were recommended by ACEHS. Based on the current regulatory status, the LUST listing is considered to represent an *historical recognized environmental condition* to the property.

1.3 Significant Data Gap Summary

Data gaps may have been encountered during the performance of this Phase I ESA and are discussed within the section of the report where they were encountered. However, according to ASTM Standard Practice E 1527-05, data gaps are only significant if "other information and/or professional experience raise reasonable concerns involving the data gap." The following is a summary of *significant data gaps* identified in this report.

SIGNIFICANT DATA GAP SUMMARY	
Report Section	Description
3.5	Current Uses of Adjoining Properties
	No <i>significant data gap</i> identified.
4.2	Environmental Liens or Activity and Use Limitations (AULs)
	No <i>significant data gap</i> identified.
5.1	Standard Environmental Records
	No <i>significant data gap</i> identified.
5.2	Physical Setting Sources
	No <i>significant data gap</i> identified.
5.3	Historical Records Sources
	No <i>significant data gap</i> identified.
6.1	Methodology and Limiting Conditions
	No <i>significant data gap</i> identified.
7.0	Interviews
	No <i>significant data gap</i> identified.

1.4 Recommendations

Based on information collected from the Phase I ESA, Cardno ATC offers the following recommendations for further action:

- Prior to any redevelopment at the property, the potential for impact or disturbance to the residual soil/groundwater contamination located in the vicinity of the former USTs and dispenser area should be assessed and appropriate action taken so that there is no significant impact to human health, safety or the environment. Any proposed redevelopment could necessitate additional sampling, health risk assessment, and/or mitigation measures.
- Prior to any remodeling or demolition of onsite improvements, a comprehensive survey for ACM and lead should be conducted.

2.0 INTRODUCTION

2.1 Purpose

The purpose of this Phase I ESA was to identify *recognized environmental conditions* and certain potential environmental conditions outside the scope of ASTM Standard Practice E 1527-05 in connection with the property at the time of the site reconnaissance. This report documents the findings, opinions and conclusions of the Phase I ESA.

2.2 Scope

This Phase I ESA was conducted in general accordance with the ASTM Standard Practice E 1527-05, consistent with a level of care and skill ordinarily practiced by the environmental consulting profession currently providing similar services under similar circumstances. Significant additions, deletions or exceptions to ASTM Standard Practice E 1527-05 are noted below or in the corresponding sections of this report. The scope of this assessment included an evaluation of the following:

- Physical setting characteristics of the property through a review of referenced sources such as topographic maps and geologic, soils and hydrologic reports.
- Usage of the property, adjoining properties and surrounding area through a review of referenced historical sources such as land title records, fire insurance maps, city directories, aerial photographs, prior reports and interviews.
- Observations and interviews regarding current property usage and conditions including: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, nonhazardous solid wastes and wastewater.
- Usage of adjoining and surrounding area properties and the likely impact of known or suspected releases of hazardous substances or petroleum products from those properties on the property.
- Information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the property.

The scope of the assessment also included consideration of the following environmental issues or conditions that are beyond the scope of ASTM Standard Practice E 1527-05:

- The scope of work for the Mold Screening was intended to be consistent with ASTM E 2418-06: Standard Guide for Readily Observable Mold and Conditions Conducive to Mold in Commercial Buildings: Baseline Survey Process. The scope of work, including potential deviations from the Standard Guide, is described as follows. The interview was limited to at least one knowledgeable person from property management or engineering staff. The document review was limited to only those relevant documents made readily available to Cardno ATC in a timely manner. The physical observations were limited to certain Heating, Ventilation and Air Conditioning (HVAC) system areas and other readily accessible building areas likely to become subject to water damage, plumbing leaks, and flooding. Unless noted otherwise herein, Cardno ATC observed the HVAC equipment room(s) and accessible mechanical rooms and, in buildings with package units in the ceiling, at least one unit per floor. Also, unless noted otherwise, Cardno ATC observed accessible areas of the basement (or lowest level), the top floor, the roof (including any penthouse areas) and at least one mid-level floor (if applicable). For multi-story buildings, the total number of floors observed (inclusive of those already mentioned) was intended to be up to 10% of the total number of floors (if readily accessible). For hotel and multi-family buildings, Cardno ATC targeted the lowest and highest levels and roof as described above and up to 10% of units, including one per

floor if readily accessible. The Mold Screening did not include destructive methods of observation. No sampling or laboratory analyses were conducted. The Mold Screening service as described herein was limited in scope and by the time and cost considerations typically associated with performing a Phase I ESA. No method can guarantee that a hazard will be discovered if evidence of the hazard is not encountered within the performance of the Mold Screening as authorized and that opinions and conclusions must, out of necessity, be extrapolated from limited information and discrete, non-continuous data points. Unidentified mold or other microbial conditions may exist on the property.

- Visual observation of suspect asbestos-containing materials (ACM), consisting of providing an opinion on the condition of suspect ACM on the property based upon visual observation during the site reconnaissance. No sampling of suspect ACM was conducted.
- Radon document review, consisting of the review of published radon data with regard to the potential for elevated levels of radon gas in the surrounding area of the property. No radon sampling was conducted.
- Lead in Drinking Water Data review, consisting of contacting the water supplier for information regarding whether or not the potable water provided to the property meets the drinking water standards for lead.
- Visual observation of Lead-based paint (LBP), consisting of providing an opinion on the potential for suspect LBP based on the construction date of buildings on the property and visual observation of the condition of suspect LBP.
- Wetlands document review, consisting of a review of a current National Wetlands Inventory map of the surrounding area to note if the property is identified as having a wetland.
- Flood plain document review, consisting of a review of a reasonably ascertainable flood plain map of the surrounding area to note if the property is identified as being located within a flood plain.

2.3 Significant Assumption

The assumptions in this report were not considered as having significant impact on the determination of *recognized environmental conditions* associated with the property.

2.4 Limitations and Exceptions

Cardno ATC has prepared this Phase I ESA report using reasonable efforts to identify *recognized environmental conditions* associated with hazardous substances or petroleum products at the property. Findings contained within this report are based on information collected from observations made on the day(s) of the site reconnaissance and from reasonably ascertainable information obtained from certain public agencies and other referenced sources.

The ASTM Standard Practice E 1527-05 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

- *Uncertainty Not Eliminated* – A Phase I ESA cannot completely eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with any property.
- *Not Exhaustive* – A Phase I ESA is not an exhaustive investigation of the property and environmental conditions on such property.

- *Past Uses of the Property* – Phase I requirements only require review of standard historical sources at five year intervals. Therefore, past uses of property at less than five year intervals may not be discovered.

Users of this report may refer to ASTM Standard Practice E 1527-05 for further information regarding these and other limitations. This report is not definitive and should not be assumed to be a complete and/or specific definition of all conditions above or below grade. Current subsurface conditions may differ from the conditions determined by surface observations, interviews and reviews of historical sources. The most reliable method of evaluating subsurface conditions is through intrusive techniques, which are beyond the scope of this report. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other property construction purposes. Any use of this report by any party, beyond the scope and intent of the original parties, shall be at the sole risk and expense of such user.

Cardno ATC makes no representation or warranty that the past or current operations at the property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, Cardno ATC is not responsible for consequences or conditions arising from facts not fully disclosed to Cardno ATC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information on surrounding area properties was requested for approximate minimum search distances and is assumed to be correct and complete unless obviously contradicted by Cardno ATC's observations or other credible referenced sources reviewed during the assessment. Cardno ATC shall not be liable for any such database firm's failure to make relevant files or documents properly available, to properly index files, or otherwise to fail to maintain or produce accurate or complete records.

Cardno ATC makes no warranty, guarantee or certification regarding the quality, accuracy or reliability of any prior report provided to Cardno ATC and discussed in this Phase I ESA report. Cardno ATC expressly disclaims any and all liability for any errors or omissions contained in any prior reports provided to Cardno ATC and discussed in this Phase I ESA report.

Cardno ATC used reasonable efforts to identify evidence of aboveground and underground storage tanks and ancillary equipment on the property during the assessment. "Reasonable efforts" were limited to observation of accessible areas, review of referenced public records and interviews. These reasonable efforts may not identify subsurface equipment or evidence hidden from view by things including, but not limited to, snow cover, paving, construction activities, stored materials and landscaping.

Any estimates of costs or quantities in this report are approximations for commercial real estate transaction due diligence purposes and are based on the findings, opinions and conclusions of this assessment, which are limited by the scope of the assessment, schedule demands, cost constraints, accessibility limitations and other factors associated with performing the Phase I ESA. Subsequent determinations of costs or quantities may vary from the estimates in this report. The estimated costs or quantities in this report are not intended to be used for financial disclosure related to the Financial Accounting Standards Board (FASB) Statement No. 143, FASB Interpretation No. 47, Sarbanes/Oxley Act or any United States Securities and Exchange Commission reporting obligations, and may not be used for such purposes in any form without the express written permission of Cardno ATC.

Cardno ATC is not a professional title insurance or land surveyor firm and makes no guarantee, express or implied, that any land title records acquired or reviewed in this report, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

The Environmental Professional Statement in Section 1.1 of this report does not “certify” the findings contained in this report and is not a legal opinion of such *Environmental Professional*. The *Environmental Professional* Statement is intended to document Cardno ATC’s opinion that an individual meeting the qualifications of an Environmental Professional was involved in the performance of the assessment and that the activities performed by, or under the supervision of, the *Environmental Professional* were performed in conformance with the standards and practices set forth in 40 CFR Part 312 per the methodology in ASTM Standard Practice E 1527-05 and the scope of work for this assessment.

Per ASTM Standard Practice E 1527-05, Section 6, User Responsibilities, the User of this assessment has specific obligations for performing tasks during this assessment that will help identify the possibility of *recognized environmental conditions* in connection with the property. Failure by the User to fully comply with the requirements may impact their ability to use this report to help qualify for *Landowner Liability Protections* (LLPs) under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Cardno ATC makes no representations or warranties regarding a User’s qualification for protection under any federal, state or local laws, rules or regulations.

In accordance with the ASTM Standard Practice E 1527-05, this report is presumed to be valid for a six month period. If the report is older than six months, the following information must be updated in order for the report to be valid: (1) regulatory review, (2) site visit, (3) interviews, (4) specialized knowledge and (5) environmental liens search. Reports older than one year may not meet the ASTM Standard Practice 1527-05 and therefore, the entire report must be updated to reflect current conditions and property-specific information.

Other limitations and exceptions that are specific to the scope of this report may be found in corresponding sections.

2.5 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of, and may be relied upon by, Geier & Geier Consulting, and any of its affiliates, and third parties authorized in writing by Geier & Geier Consulting and Cardno ATC, including the lender(s) in connection with a secured financing of the property, and their respective successors and assigns. Any third party agrees by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgment that actual site conditions may change with time, and that hidden conditions may exist at the property that were not discovered within the authorized scope of the assessment. Any use by or distribution of this report to third parties, without the express written consent of Cardno ATC, is at the sole risk and expense of such third party.

Cardno ATC makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either express or implied. Unless otherwise agreed upon in writing by Cardno ATC and a third party, Cardno ATC’s liability to any third party authorized to use or rely on this report with respect to any acts or omissions shall be limited to a total maximum amount of \$100,000.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The property address is 21195 Center Street in Castro Valley, Alameda County, California, 94546. The Site Vicinity Map is located in Appendix A. The Site Plan is located in Appendix B. Site Photographs are provided in Appendix C. According to information obtained from the Alameda County Property Assessor's office, the property is identified as Assessor Parcel Numbers (APNs); 084C065000100, 084C065000204, and 084C065000203.

3.2 Surrounding Area General Characteristics

The property is located within the City of Castro Valley in an area characterized by residential and commercial uses. Surface topography across the property and in the surrounding area is relatively flat with a slope towards the west. Specific adjacent and abutting properties are summarized in Section 3.5.

3.3 Current Use of the Property

The property is currently developed as a storage facility for the California Department of Transportation, known as Caltrans Storage Yard. The storage yard is developed with six structures and a mobile trailer. The property buildings were reportedly constructed between circa 1939 and 2005. Parking is located in asphalt-paved areas. A Site Plan is located in Appendix B.

Following is a table summarizing tenant use of the property. A Site Plan is located in Appendix B.

TENANT USE OF THE PROPERTY			
Tenant Name	Location	Type of Use	Comments
Caltrans	Building 1	Administrative Office, currently vacant	None
Caltrans	Building 2	Equipment Storage, currently vacant	None
Caltrans	Building 3	Equipment Storage, currently vacant	None
Caltrans	Building 4	Equipment Storage	None
Caltrans	Building 5	Equipment Storage, currently vacant	None
Caltrans	Building 6	Equipment Storage	None
Caltrans	Mobile Trailer	Administrative Office/Equipment Storage, currently vacant	None

3.4 Description of Property Improvements

The following table provides general descriptions of the property improvements.

PROPERTY IMPROVEMENTS	
Size of Property (approximate)	1.7 Acres
General Topography of Property	Relatively flat with a slope towards the west
Adjoining and/or Access/Egress Roads	Center Street to the east
Paved or Concrete Areas (including parking)	The entire property is paved.
Unimproved Areas	None
Landscaped Areas	None
Surface Water	None
Potable Water Source	East Bay Municipal Utility District (EBMUD)
Sanitary Sewer Utility	Castro Valley Sanitary District
Storm Sewer Utility	Alameda County Public Works Department
Electrical Utility	Pacific Gas and Electric (PG&E)
Natural Gas Utility	PG&E
Current Occupancy Status	General description or percent occupied
Unoccupied Buildings/Spaces/Structures	General description including location vacant buildings/areas

PHASE I ENVIRONMENTAL SITE ASSESSMENT
 Caltrans Storage Yard
 21195 Center Street
 Castro Valley, California 94546

PROPERTY IMPROVEMENTS	
Number of Occupied Buildings	Two of the six buildings are used for the storage of Caltrans equipment; the remaining buildings are vacant.

Building Name or General Building Description	Building 1
Number of Floors	One
Total Square Feet of Space (approximate)	1,200 square feet
Construction Completion Date (year)	Circa 1939
Construction Type	Wood Frame
Interior Finishes Description	Drywall, ceramic tile, vinyl floor tile, acoustical ceiling tiles
Exterior Finishes Description	Wood
Cooling System Type	Packaged Terminal Air Conditioner (PTAC)
Heating System Type	Packaged Terminal Heat Pump (PTHP)
Emergency Power	None

Building Name or General Building Description	Buildings 2, 3, and 5
Number of Floors	One
Total Square Feet of Space (approximate)	900 square feet (each)
Construction Completion Date (year)	Circa 1958
Construction Type	Aluminum walls with aluminum roof
Interior Finishes Description	Aluminum walls with aluminum roof and concrete floor
Exterior Finishes Description	Aluminum walls with aluminum roof
Cooling System Type	None
Heating System Type	None
Emergency Power	None

Building Name or General Building Description	Building 4
Number of Floors	One
Total Square Feet of Space (approximate)	1,000 square feet
Construction Completion Date (year)	Circa 2005
Construction Type	Aluminum garage structure
Interior Finishes Description	Aluminum walls with aluminum roof and concrete floor
Exterior Finishes Description	Aluminum walls with aluminum roof
Cooling System Type	None
Heating System Type	None
Emergency Power	None

Building Name or General Building Description	Building 6
Number of Floors	One
Total Square Feet of Space (approximate)	3,000 square feet
Construction Completion Date (year)	Circa 1939
Construction Type	Office facility with garage structure
Interior Finishes Description	Wooden frame and concrete floor
Exterior Finishes Description	Wooden frame
Cooling System Type	PTAC
Heating System Type	PTHP
Emergency Power	None

PHASE I ENVIRONMENTAL SITE ASSESSMENT
 Caltrans Storage Yard
 21195 Center Street
 Castro Valley, California 94546

Building Name or General Building Description	Mobile trailer
Number of Floors	One
Total Square Feet of Space (approximate)	800 square feet
Construction Completion Date (year)	Unknown
Construction Type	Mobile trailer
Interior Finishes Description	Aluminum walls with aluminum roof
Exterior Finishes Description	Aluminum walls with aluminum roof
Cooling System Type	Packaged Terminal Air Conditioner (PTAC)
Heating System Type	Packaged Terminal Heat Pump (PTHP)
Emergency Power	None

3.5 Current Uses of Adjoining Properties

Current uses of the adjoining properties were observed to be as follows:

Direction from Property	Address	Occupant(s) Name	Current Use	Potential Environmental Conditions
North	Various Addresses	Various Private Residents	Residential	None
Southeast	N/A	Castro Valley Boulevard	Transportation	None
Southwest	Various Addresses	Various Private Residents	Residential	None
East (Beyond Center Street)	3300 Castro Valley Boulevard	Domino's Pizza, Keller Williams Realty, The Dry Cleaner, Chicago Title, Valley Hair and Nail Design, Kasper's Restaurant, Bicycles Sales and Service	Commercial	Refer to Section 5.1.2
West	Various Addresses	Various Private Residents	Residential	None

4.0 USER PROVIDED INFORMATION

The following section summarizes information (if any) provided by Geier & Geier Consulting (User) with regard to the Phase I ESA. Documentation may be found in Appendix D or where referenced in this report.

4.1 Title Records

The User provided no title records information.

4.2 Environmental Liens or Activity and Use Limitations (AULs)

The User provided no information regarding property environmental liens or activity and use limitations (AULs). Cardno ATC contracted EDR to perform an environmental lien search for the property. According to the environmental lien and AUL search report, no environmental liens or AULs are reported for the property.

A copy of the report is included in Appendix L.

4.3 Specialized Knowledge or Experience of the User

The User provided no specialized knowledge regarding *recognized environmental conditions* associated with the property.

4.4 Significant Valuation Reduction for Environmental Issues

The User provided no information regarding a significant valuation reduction for environmental issues associated with the property.

4.5 Owner, Property Manager and Occupant Information

The User identified the property owner, manager and/or occupants as Caltrans, Right of Way Division.

4.6 Reason for Performing Phase I ESA

According to information provided by the User, this Phase I ESA will be used in connection with a commercial real estate transaction to identify *recognized environmental conditions* associated with the property.

4.7 Other User Provided Documents

The User provided no other documents as described in the ASTM Standard Practice E 1527-05.

5.0 RECORDS REVIEW

5.1 Standard Environmental Records

The regulatory agency database report discussed in this section, provided by Environmental Data Resources Inc. (EDR) of Milford, Connecticut, was reviewed for information regarding reported releases of hazardous substances and petroleum products on or near the property. Cardno ATC also reviewed the “unmappable” (also referred to as “orphan”) listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that could not be plotted with confidence, but are potentially in the general area of the property based on the partial street address, city, or zip code. Any unmappable site that was identified by Cardno ATC as a being within the approximate minimum search distance from the property based on the site reconnaissance and/or cross-referencing to mapped listings, is included in the discussion within this section. The complete regulatory agency database report may be found in Appendix E.

The following is a summary of the findings of the database review.

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS			
Regulatory Database	Approx. Minimum Search Distance	Property Listed?	# Sites Listed
Federal National Priority List (NPL)	1 mile	No	0
Federal Delisted NPL	½ mile	No	0
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list	½ mile	No	0
Federal CERCLIS No Further Remedial Action Planned (NFRAP)	½ mile	No	0
Federal Resource Conservation and Recovery Act (RCRA), Corrective Action facilities (CORRACTS)	1 mile	No	0
Federal RCRIS non- CORRACTS Treatment, Storage, and Disposal Facilities (TSD)	½ mile	No	0
Federal RCRA Generators	Property & Adjoining	Yes	1
Federal Institutional Control/Engineering Control Registry	Property	No	
Federal Emergency Response Notification System (ERNS) list	Property	No	
Facility Index System/Facility Registry System (FINDS)	Property & Adjoining	Yes	1
State and Tribal NPL	1 mile	No	1
State and Tribal CERCLIS	½ mile	No	
State and Tribal Landfill or Solid Waste Disposal Sites	½ mile	No	
State and Tribal Leaking Underground Storage Tanks (LUST)	½ mile	Yes	11
State and Tribal Registered Underground Storage Tanks (UST)	Property & Adjoining	No	0
SWEEPS UST	Property & Adjoining	Yes	1
Historical UST (HIST UST)	Property & Adjoining	Yes	1
Hazardous Waste Manifests (HAZNET)	Property & Adjoining	Yes	1
HIST CORTESE	½ mile	Yes	
State and Tribal Institutional Control/Engineering Control Registry	Property	No	
State and Tribal Voluntary Cleanup Site	½ mile	No	
State and Tribal Brownfield Sites	½ mile	No	
California Department of Toxic Substances (ENVIROSTOR)	½ mile	No	1
CA FID UST	½ mile	Yes	5

PHASE I ENVIRONMENTAL SITE ASSESSMENT
 Caltrans Storage Yard
 21195 Center Street
 Castro Valley, California 94546

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS			
Regulatory Database	Approx. Minimum Search Distance	Property Listed?	# Sites Listed
Alameda County Contaminated Site (CS)	½ mile	Yes	8
Notify 65	½ mile	No	1
DRYCLEANERS	½ mile	No	1
EDR US Hist Auto Stations	½ mile	No	1
EDR US Hist Cleaners	½ mile	No	3

5.1.1 Federal Agency Database Findings

The property was listed within the federal databases searched by EDR. Federal listing(s) as well as state and tribal listings for the property are fully discussed in Section 5.1.1.

The following listing(s) with a known or significant potential for release and impact on the property were identified in the federal agency databases searched:

Caltrans Hayward Maintenance Station
 21195 Center Street

Databases: RCRA-SQG, FINDS, HAZNET, HIST UST, HIST CORTESE, LUST, CA FID UST, Alameda County CS, SWEEPS UST

Approximate Distance from the Property: N/A (the property)

Assumed Groundwater Gradient: N/A (the property)

Regulatory Data Summary: The property is listed as a Federal Resource Conservation and Recovery Act – Small Quantity Generator (RCRA-SQG) for the generation of more than 100 kilograms (kg) and less than 1000 kg of hazardous wastes during any calendar month. There were no reported violations associated with this listing. The property is also listed within the Alameda County HAZNET database due to the storage, bulking and or transfer of aged or surplus organics and/or other organics. Cardno ATC reviewed files maintained by the Alameda County Environmental Health Department (ACEHD) on October 31, 2013. According to files reviewed, hazard materials stored onsite included; ACZA (Ammoniacal Copper Zinc Arsenate) treated wood, pyrotechnic devices (Highway safety fuses), petroleum hydrocarbon (crank motor oil), commercial propane, welding oxygen, and water-borne paints. ACEHD records contained one violation for the improper labeling of used 55-gallon drums stored on the property. No other violations regarding hazard materials on the property were reported.

The remaining listings reported for the property are related to former onsite underground storage tanks (USTs). In January of 1989 one 1,000-gallon gasoline UST and one 260-gallon diesel UST were removed from the property (refer to Site Map in Appendix B). During tank removal activities, three soil samples were collected and analytical results identified 1.7 parts per million (ppm) total petroleum hydrocarbons as gasoline (TPH-g), 2,100 ppm total petroleum hydrocarbons as diesel (TPH-d), and non-detect for benzene, toluene, ethylbenzene and xylene (BTEX). During subsequent site investigation activities conducted between January of 1990 and February of 1991, 14 soil borings were advanced in the vicinity of the former USTs and dispenser area to access the vertical and lateral extent of soil contamination. A monitoring well (MW-1) was also installed near the southeastern extent of the contamination plume.

In September of 1992, over excavation of approximately 391 tons of contaminated soil was completed in the vicinity of the former USTs and dispenser area. Subsequent soil samples collected after over excavation activities were complete identified 54 ppm TPH-g, 3.74 ppm TPH-d, and non-detect for BTEX. Three additional monitoring wells (VW-1, VW-2, and VW-3) were installed on September 28, 1992 to access impacts to groundwater. Groundwater samples analyzed between October of 1994 and March of 1996 were non-detect for TPH-g, TPH-d, and

BTEX during all sampling events, except for low levels of BTEX detected during the last quarter of sampling in March of 1996. Groundwater flow at the property was reported to the southwest. According to a Well Abandonment Notification, dated June 11, 1997, all four onsite monitoring wells were properly abandoned on May 22, 1997. A copy of the notification is included in Appendix L.

According to the Fuel Leak Site Case Closure Summary issued by the Alameda County Environmental Health Services (ACEHS) on June 25, 1997, 54 ppm TPH-g, 3.74 ppm TPH-d, 0.58 ppm ethylbenzene, and 0.226 ppm xylene remain in the soil in the vicinity of the former UST pit and dispenser area. In addition, 1.9 parts per billion (ppb) benzene, 3.1 ppb toluene, 1.3 ppb ethylbenzene, and 6.9 ppb xylenes exist within groundwater at the site as of March 1996. According to ACEHS, the corrective actions performed protect public health for the current land use, however if land use changes are proposed, corrective actions should be reviewed. No further actions were recommended by ACEHS. Copies of the Fuel Leak Site Case Closure Summary and closure letter for the property are included in Appendix L.

Discussion: Based on the current regulatory status, the LUST listing is considered to represent an *historical recognized environmental condition* to the property.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the other sites listed in the federal agency databases are considered to represent a likely past, present or material threat of release on the property.

5.1.2 State and Tribal Database Findings

The following listing(s) with a known or significant potential for release and impact on the property were identified in the state and tribal databases searched:

Texaco/Speedee Oil Change
3940 Castro Valley Boulevard

Databases: LUST

Approximate Distance from the Property: 754 Feet

Assumed Groundwater Gradient: Down-gradient from the property

Regulatory Data Summary: This facility is listed as a LUST site with a closed status. A release at the site was reported in June of 1985. According to information obtained from the RWQCB GeoTracker website (<http://geotracker.swrcb.ca.gov>), excavation was performed at the site in June of 1985. The site received closure from ACEHD on February 27, 1995.

Discussion: Based on the down-gradient location, the site is not considered to represent a likely past, present or material threat of release on the property.

The Dry Cleaners
3300 East Castro Valley Boulevard

Databases: EDR US Hist Cleaners

Approximate Distance from the Property: 362 Feet

Assumed Groundwater Gradient: Cross-gradient from the property

Regulatory Data Summary: This facility is listed as a historical cleaners by EDR for the years 1999 to 2012. No violations or releases are reported for the facility.

Discussion: Based on the cross-gradient location, this facility is not considered to represent a likely past, present or material threat of release on the property.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the other sites listed in the state and tribal databases are considered to represent a likely past, present or material threat of release on the property.

5.1.3 Local Environmental Records Sources

Local Health Department

Cardno ATC reviewed available records maintained by the Alameda County Environmental Health Department (ACEHD). Available records for the property are discussed in Section 5.1.2.

Local Environmental Agency

Cardno ATC contacted the Regional Water Quality Control Board (RWQCB) and requested to review available information regarding the property. According to Ms. Melinda Wong of the RWQCB, there are no files for the property.

According to the RWQCB GeoTracker website, <http://geotracker.swrcb.ca.gov>, a leaking underground storage tank (LUST) site is located on the property. Refer to Section 5.1.1 for further discussion.

Fire Department

Cardno ATC contacted the Alameda County Fire Department (ACFD) to review available information regarding the property. The ACFD has not provided a response to Cardno ATC's request as of the date of this report. If information becomes available to Cardno ATC that alters the conclusions and/or recommendations presented herein, an addendum will be submitted.

Department of Planning and Zoning

Cardno ATC spoke with Mr. "Andy" (last name withheld) of the Alameda County Planning Commission, who stated that the property is currently zoned Castro Valley Central Business District, Subsection 10, which appears to be appropriate for the current use.

Building Department

Cardno ATC contacted the Alameda County Building Department to review available information regarding the property. The Department has not provided a response to Cardno ATC's request as of the date of this report. If information becomes available to Cardno ATC that alters the conclusions and/or recommendations presented herein, an addendum will be submitted.

Electrical Utility Company

Cardno ATC confirmed the property is provided electrical service by PG&E.

Water Utility

Cardno ATC confirmed the property is provided water utility by EBMUD.

Sewer Utility

Cardno ATC confirmed the property is provided sewer utility by the Castro Valley Sanitary District.

Other Local Environmental Records Sources

No additional local environmental records sources were reviewed.

5.2 Physical Setting Sources

5.2.1 Topography

Based on the United States Geological Survey (USGS) 7.5-Minute Topographic Map Series, Hayward, California, Quadrangle Topographic Map, photo revised 1980, the property is located approximately 228 feet above mean sea level (MSL) and has a gradually sloping topography towards the west.

A copy of the topographic map is included in Appendix A.

5.2.2 Geology

Based on the California Department of Conservation, California Geological Survey, Generalized Geologic Map of California Note 17, dated April 2002, the property is primarily underlain by Quaternary sedimentary deposits. Sedimentary rocks form as accumulations of mineral material in oceans (marine) or on continents (continental). Quaternary sedimentary rocks include gravel, sand, silt, and clay deposited mostly in valleys and lowlands onshore.

5.2.3 Soils

According to Cardno ATC's review of the United States Department of Agriculture Soil Conservation Service Web-Based Soil Survey, the property is entirely underlain by Altamont clay with five to 15 percent slopes.

A copy of the soil map is included in Appendix L.

5.2.4 Hydrology

Considering the surface topography for the property area, as interpreted from the Hayward Quadrangle map, local groundwater would be expected to flow toward the west. Cardno ATC reviewed groundwater monitoring reports for onsite groundwater monitoring wells from 1994 to 1996. Groundwater flow was reported to the southwest. Therefore, in assessing potential off-site environmental impacts, facilities located to the northeast of the property are of primary concern.

Actual groundwater flow direction is often locally influenced by factors such as underground structures, seasonal fluctuations, soil and bedrock geology, production wells, and other factors beyond the scope of this study. The current groundwater flow direction under the property can be accurately determined only by installing groundwater-monitoring wells, which was beyond the scope of this project.

5.2.5 Other Physical Setting Sources

Wetlands

Based on a review of the United States Department of the Interior, National Wetlands Inventory (NWI) Map (undated, online Wetlands Mapper at <http://www.fws.gov/wetlands/>), there are no jurisdictional wetlands on the property. Furthermore, ATC did not observe any areas suggestive of wetlands at the property.

The NWI map for the property is included in Appendix L.

Floodplains

According to the Federal Emergency Management Agency (FEMA), the property is located in Flood Zone X, which is identified by FEMA as "areas determined to be outside the 0.2% annual chance floodplain" (Flood Insurance Rate Map [FIRM] Map Number 06001C279G, dated August 3, 2009).

A copy of the FIRM is included in Appendix L.

5.3 Historical Records Sources

The following table summarizes the findings of the research presented below pertaining to historical property and surrounding area uses.

HISTORICAL USE SUMMARY				
Period	Identified Historical Uses		Source(s)	Intervals/Comments
	Property	Surrounding Area		
Prior to 1940	Undeveloped/ Agriculture/ Residential	Agriculture	Aerial Photograph Topographic Maps	The earliest available record is an 1899 topographic map which depicts the property and surrounding area as generally undeveloped.
1940-1960	Commercial	Residential	Aerial Photographs Topographic Maps	No use changes across data gaps.
1961-1980	Commercial	Residential	Aerial Photographs Topographic Maps	No use changes across data gaps.
1981 to 2001	Commercial	Residential	Aerial Photographs Topographic Maps Property Tax Files Records Review	No data gaps.
2002-present	Commercial	Residential	Aerial Photographs Property Tax Files Records Review	No data gaps.

In general, the property was developed for residential/agricultural use prior to 1940. By circa 1958 the property was utilized by the state of California as a maintenance and storage facility for highway operations.

5.3.1 Aerial Photographs

Cardno ATC reviewed available aerial photographs of the property and surrounding areas at SOURCE. Available aerial photographs ranged from 1939 to 2012. The following are descriptions and interpretations from the aerial photograph review.

AERIAL PHOTOGRAPH SUMMARY		
Year	Scale	Comments
1939, 1946	1 inch = 500 feet	Property: The property appears to be developed with a residential structure and another structure which appears to be a barn or storage facility for agricultural equipment. Surrounding Area: The surrounding areas are depicted as agricultural land.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
 Caltrans Storage Yard
 21195 Center Street
 Castro Valley, California 94546

AERIAL PHOTOGRAPH SUMMARY		
Year	Scale	Comments
1958	1 inch = 500 feet	Property: The property appears to be developed as the Caltrans Storage Yard, Buildings 1, 2, 3, 5 and 6 are depicted in the aerial photograph. Surrounding Area: The surrounding areas to the north, south and west of the property are developed for residential use. The surrounding area to the east of the property, beyond Center Street, is improved with residential houses followed by vacant land.
1968, 1974	1 inch = 500 feet	Property: Due to the poor resolution, no determinations can be made from the aerial photograph(s). Surrounding Area: Due to the poor resolution, no determinations can be made from the aerial photograph(s).
1984	1 inch = 500 feet	Property: No changes since the 1958 aerial photograph. Surrounding Area: Redevelopment of the east adjacent area (beyond Center Street) is underway. Construction of Interstate-580 is depicted to the south of the property. The surrounding areas to the north and west of the property are developed for residential use.
1993, 1999	1 inch = 500 feet	Property: No changes since the 1958 aerial photograph. Surrounding Area: The surrounding area to the east has been redeveloped for commercial/retail use. The adjoining property to the south is developed for residential use, followed by Interstate-580. The surrounding areas to the north and west of the property are developed for residential use.
2005, 2006, 2009, 2010, 2012	1 inch = 500 feet	Property: The property is depicted in the current configuration (with all 6 buildings) by the 2005 aerial photograph. Surrounding Area: No changes since the 1993 aerial photograph.

The review of aerial photographs did reveal the property's past use as the Caltrans Storage Yard, indicating a potential *recognized environmental conditions* at the property. For further discussion refer to Section 5.1.1.

Copies of reproducible aerial photographs are included in Appendix F.

5.3.2 Fire Insurance Maps

A search for fire insurance maps for the property and surrounding area was conducted by EDR. No such maps for the property were available.

Documentation is included in Appendix G.

5.3.3 Property Tax Files

Cardno ATC reviewed reasonably ascertainable tax files provided by the Alameda County Property Assessor's Office for historical ownership information pertaining to the property. According to these records, the property has been owned by the State of California since at least 1993. Records prior to 1993 were not readily available.

5.3.4 Recorded Land Title Records

The acquisition of recorded land title records was not required by the scope of work for the Phase I ESA.

5.3.5 Historical USGS Topographic Maps

Cardno ATC reviewed available historical USGS Topographic Maps for information regarding past uses of the property provided by EDR. Historical USGS Topographic Maps for the years 1899, 1915, 1947, 1948, 1950, 1959, 1968, 1973, 1980 and 1993 were reviewed. The 1899 and 1915 maps depict the property

and surrounding area as undeveloped land. The 1947, 1948 and 1950 maps depict structures along the property and surrounding areas, however the use of these structures cannot be determined. By the 1959 map, the property and surrounding areas are shaded pink or grey, indicating a developed area.

Documentation is included in Appendix G. The review of historic USGS Topographic Maps did not identify specific past uses indicating *recognized environmental conditions* at the property or surrounding area.

5.3.6 City Directories

Research regarding the availability of historical city directories was conducted by EDR. No historical city directories were available for the property. City directory listings for the surrounding areas were limited to individual residents.

Documentation is included in Appendix G. The review of city directories did not identify past uses indicating *recognized environmental conditions* at the property or surrounding areas.

5.3.7 Building Department Records

Cardno ATC contacted the Alameda County Building Department to review available information regarding the property. The Department has not provided a response to Cardno ATC's request as of the date of this report. If information becomes available to Cardno ATC that alters the conclusions and/or recommendations presented herein, an addendum will be submitted.

5.3.8 Zoning/Land Use Records

Cardno ATC spoke with Mr. "Andy" (last name withheld) of the Alameda County Planning Commission, who stated that the property is currently zoned Castro Valley Central Business District, Subsection 10 (CVCBD-10), which appears to be appropriate for the current use. The property has been zoned CVCBD-10 since at least 1993. Zoning information prior to 1993 was not readily available. The review of historical zoning/land use records did not identify past uses indicating *recognized environmental conditions* at the property or surrounding area. Documentation is included in Appendix G.

5.3.9 Prior Reports

No prior reports were made available for review.

5.3.10 Other Historical Sources

No other historical sources were reviewed.

6.0 SITE RECONNAISSANCE

The following is a summary of visual and/or physical observations of the property on the day of the site visit. Photographs can be found in Appendix C.

6.1 Methodology and Limiting Conditions

Ms. Destiny Hazra, Senior Scientist for Cardno ATC, conducted the site reconnaissance on October 28, 2013 and was escorted by Mr. Mark Shindler, District Office Chief for the Caltrans Right of Way Division, as well as Mr. Joe De la Rosa of the Caltrans Maintenance Division. The site reconnaissance consisted of visual and/or physical observations of: the property and improvements; adjoining sites as viewed from the property; and, the surrounding area based on visual observations made during the trip to and from the property. Unimproved portions of the property (if any) were observed along the perimeter and in a general grid pattern in safely accessible areas, if accessible and possible. Building exteriors (if any) were observed along the perimeter from the ground, unless described otherwise. Building interiors (if any) were observed as they were made safely accessible, unless described otherwise.

6.2 Hazardous Substance Use, Storage, and Disposal

Cardno ATC did not observe the use, storage or disposal of hazardous substances, including hazardous wastes, on the property.

6.3 Underground Storage Tanks (USTs)

Cardno ATC did not observe evidence of USTs on the property.

6.4 Aboveground Storage Tanks (ASTs)

Cardno ATC did not observe evidence of ASTs on the property.

6.5 Other Petroleum Products

Cardno ATC did not observe the use, storage or disposal of other petroleum products in transformers, hydraulic lifts or other containers on the property.

6.6 Polychlorinated Biphenyls (PCBs)

Cardno ATC did not observe evidence of the use, storage or disposal of PCB-containing transformers, hydraulic lifts, or other equipment on the property.

6.7 Unidentified Substance Containers

Cardno ATC did not observe the presence of unidentified substance containers on the property.

6.8 Nonhazardous Solid Waste

Cardno ATC did not observe evidence of the generation, storage or disposal of nonhazardous solid waste on the property.

6.9 Wastewater

Cardno ATC observed evidence of wastewater generated, treated or discharged (including sanitary sewage and stormwater) on the property or to adjoining properties as summarized below.

WASTEWATER SUMMARY TABLE			
Type of Wastewater	Generation Process	Treatment System?	Discharged To?
Domestic Sanitary Sewage	Onsite restroom	No	Sanitary Sewer
Stormwater	Rainfall	No	Storm Sewer

The generation and discharge of wastewater at the property is not considered to represent an environmental concern.

6.10 Waste Pits, Ponds and Lagoons

Cardno ATC did not observe evidence of waste pits, ponds or lagoons on the property.

6.11 Drains and Sumps

Cardno ATC did not observe evidence of drains or sumps on the property.

6.12 Septic Systems

Cardno ATC did not observe evidence of a septic system on the property.

6.13 Stormwater Management System

Stormwater at the property flows over building rooftops, paved parking lots, and roadways and travels towards drains located along the southwestern portion of the property, which discharge into the municipal stormwater system. The property is a mix of paved parking lot with covered areas consisting of building footprints. The parking/driveway areas are paved and in good condition with some areas of oil staining from parked cars. No strong odors or stressed vegetation was observed.

6.14 Wells

Cardno ATC did not observe evidence of wells on the property.

7.0 INTERVIEWS

The following persons were interviewed to obtain information regarding *recognized environmental conditions* in connection with the property:

Not included in this list are those governmental employees that were contacted solely for the purpose of retrieving public information pertaining to the property and who would not be expected to have firsthand knowledge of recognized environmental conditions at the property

INTERVIEW SUMMARY				
Role	Name	Title/Company	Years Assoc. With Property	Interview Type
Site Management	Mark Shindler	Caltrans, District Office Chief, Right of Way Division	Unknown	In person
Site Maintenance	Joe De La Rosa	Caltrans, Maintenance Division	2005-2009	In person

Pertinent information from the interviews is discussed in applicable sections of this report with details (including failed attempts to interview) documented on Record of Communication forms in Appendix J.

8.0 OTHER ENVIRONMENTAL CONDITIONS

8.1 Asbestos-Containing Materials (ACM)

Based on the scope of work for this ESA, sampling and analyses for ACM was not conducted. All suspect ACM should be properly assessed prior to disturbance from construction or maintenance activities. Buildings 1, 2, 3, 5 and 6 on the property was reportedly built prior to 1960. Observed building materials and finishes within Building 1 and Building 6 were noted to be in poor condition at the time of the site visit. A current O&M plan for asbestos is not present at the property.

8.2 Radon

Radon is a naturally occurring colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. The EPA guidance action level for annual residential exposure to radon is 4.0 picocuries per liter of air (pCi/L). The guidance action level is not a regulatory requirement for private owners of commercial real estate, but is commonly used for comparison purposes to suggest whether further action at a building may be prudent.

Cardno ATC's review of published radon data indicates that the property is located in an area of moderate propensity with regard to the potential for elevated levels of radon gas. Alameda County is listed as being within Zone 2, where average indoor levels are expected to be between 2.0 and 4.0 pCi/L. Additional federal area radon statistics for zip code 94546, within Alameda County, report results for 28 short-term tests with 27 results below 4.0 pCi/L and one result above 4.0 pCi/L. Given the available statistics, radon is not considered to represent a concern, and no additional investigations are recommended at this time.

8.3 Lead in Drinking Water

Cardno ATC confirmed with the EBMUD that the municipally-supplied water meets or exceeds the applicable drinking water standards, including those for lead. Lead in drinking water testing was not conducted for this Phase I ESA.

8.4 Lead-Based Paint (LBP)

Based on the commercial usage of the property, the consideration of LBP on painted surfaces was not included in the scope of work for this ESA.

8.5 Mold Screening

Cardno ATC conducted a screening survey for readily observable mold and conditions conducive to mold on the property. The screening consisted of limited interview, document review (if available) and physical observation. Cardno ATC interviewed Mr. Joe De La Rosa, Caltrans Maintenance Division, regarding potential mold conditions at the property. Mr. De La Rosa was unaware of any mold or conditions conducive to mold on the property. Cardno ATC observed no mold at the property at the time of the site visit. Cardno ATC requested documentation regarding current or historical mold conditions at the property. No documentation was provided to Cardno ATC for review.

8.6 Additional User Requested Conditions

No additional User requested services were included in the scope of work for this ESA.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 07/11/2013 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 07/11/2013 has revealed that there is

EXECUTIVE SUMMARY

1 RCRA-CESQG site within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 09/05/2013 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/11/2013 has revealed that

EXECUTIVE SUMMARY

there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there is 1 EDR US Hist Auto Stat site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
Not reported	3005 GROVE WAY	SSE 1/8 - 1/4 (0.243 mi.)	E23	47

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 3 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D005
Waste name: BARIUM

Waste code: D006
Waste name: CADMIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: D016
Waste name: 2,4-D

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: U002
Waste name: ACETONE (I)

Waste code: U080
Waste name: METHANE, DICHLORO-

Waste code: U160
Waste name: 2-BUTANONE, PEROXIDE (R,T)

Violation Status: No violations found

Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Four USTs were removed in April 1993. Significantly elevated TPH-g and benzene concentrations were detected in UST compliance soil samples and groundwater samples. To delineate subsurface impact, borings were installed in 1995 and 1996. Elevated hydrocarbon concentrations were detected in soil, soil vapor and groundwater, including free product. Corrective action appears necessary to abate free product.

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

FINDS:

Registry ID: 110012543550

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>. On July 12, 1990, Tank Protect Engineering (TPE) removed one 4,000-gallon, two 3,000-gallon steel gasoline underground storage tanks (USTs), and one 250-gallon waste oil tank. Approximately 250 cubic yards of soil was excavated and stockpiled as a result of the UST removals. During the tank removals, TPE observed that native soil in the excavation pit was discolored and emitted a hydrocarbons odor indicating that an unauthorized release had occurred. An Unauthorized Release Report was

MAP FINDINGS

ANTHONYS AUTO SERVICE (Continued)

S101579939

filed on August 8, 1990. Seven soil samples were collected following the UST removals. Soil sample analytical results detected TPH-g and benzene at concentrations as high as 3,200 mg/kg and 12 mg/kg, respectively. To characterize the site, TPE conducted an onsite subsurface utility survey, installed seven borings of which three were converted to groundwater monitoring wells, over-excavated the UST pit and collected 11 confirmation soil samples, remediated approximately 450 cubic yards of stockpiled soil, backfilled two excavation pits, and sampled three groundwater monitoring wells. In August 16, 1990, four borings (SB-1 through SB-4) were installed to a depth of 35 feet bgs. Soil sample analytical results detected TPH-g and benzene at maximum concentrations of 15 mg/kg and 0.0073 mg/kg, respectively. During the week of November 5, 1990, TPE over-excavated the excavation pit until field screening indicated that all contaminated soil had been excavated from the sidewalls and base. Soil sample analytical results did not detect TPH-g above the laboratory detection limit of <1.0 mg/kg and detected benzene at maximum concentrations of 0.0092 mg/kg. TPE remediated the stockpiled soil by oxidizing the hydrocarbons with a hydrogen peroxide solution. The contaminated soil was spread 8 to 16-inches thick over a layer of plastic. The soil was treated by applying several doses of the hydrogen peroxide solution with a sprayer while the soil was being turned with a backhoe. The stockpiled remediation confirmation soil samples did not detect TPH-g above the laboratory detection limit of <1.0 mg/kg and detected benzene at maximum concentrations of 0.17 mg/kg. Based on the analytical results, ACEH verbally approved backfilling the fuel and waste oil excavations during the week of January 21, 1991. Approximately 50 cubic yards of aggregate base was placed in the excavation followed by approximately 440 cubic yards of compacted, remediated stockpiled soil, to the ground surface. Approximately 10 cubic yards of compacted, remediated stockpiled soil was placed in the waste oil excavation. The exploratory borings for the three groundwater monitoring wells were drilled to total depths ranging from 39.5 to 49.5 feet bgs. Groundwater sample analytical results detected TPH-g at a maximum concentration of 160 g/L and did not detect benzene above the laboratory detection limit of <0.30 g/L. Interference was detected in the gasoline analysis. A scan conducted by Sequoia Analytical identified the compound as iso-Octane, a hydrocarbon that may be used in motor fuel of as a solvent and thinner. Five quarters of consecutive groundwater sampling was conducted at the site.

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Date Satisfied: Not reported
Site Status: Active
Site Type: CSITES
Completed: 11/01/2012
Description: Dry cleaning operation since at least 1974, using perchloroethylene. Initially using a 30-pound capacity unit, in 1975, this was replaced with a 60-pound capacity unit. These units were served by a filter and carbon reclaimer. The reclaimer would recover solvent for reuse. The filter unit would generate filter powder residue. In 1981, the reclaimer was replaced with a larger unit. In 1991, filter and reclaimer were replaced with a closed loop non-vented unit and secondary containment was installed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 10/11/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 01/20/2014
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 10/11/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 01/20/2014
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/29/2013	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/29/2013	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/11/2013

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 06/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2013	Telephone: 703-603-0695
Date Made Active in Reports: 10/03/2013	Last EDR Contact: 09/10/2013
Number of Days to Update: 104	Next Scheduled EDR Contact: 12/23/2013
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 06/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2013	Telephone: 703-603-0695

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2012	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/17/2013	Telephone: 202-267-2180
Date Made Active in Reports: 02/15/2013	Last EDR Contact: 10/01/2013
Number of Days to Update: 29	Next Scheduled EDR Contact: 01/13/2014
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 09/05/2013	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 09/05/2013	Telephone: 916-323-3400
Date Made Active in Reports: 10/10/2013	Last EDR Contact: 09/05/2013
Number of Days to Update: 35	Next Scheduled EDR Contact: 11/18/2013
	Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 09/05/2013	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 09/05/2013	Telephone: 916-323-3400

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

CALTRANS STORAGE YARD
21195 CANTER STREET
CASTRO VALLEY, CA 94546

TARGET PROPERTY COORDINATES

Latitude (North):	37.6938 - 37° 41' 37.68"
Longitude (West):	122.0631 - 122° 3' 47.16"
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	582601.1
UTM Y (Meters):	4172050.5
Elevation:	228 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	37122-F1 HAYWARD, CA
Most Recent Revision:	1980

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> ALAMEDA, CA	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
--	--

Flood Plain Panel at Target Property: 06001C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> HAYWARD	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Altamont

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	27 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.1
2	27 inches	50 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
3	50 inches	53 inches	weathered bedrock	Not reported	Not reported	Max: 0 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: Clear Lake

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

RESUMES

Gabe Stivala, P.G.

Current Position

Senior Project Manager /
Senior Geologist

Profession

Remediation and Assessment
Management

Years' Experience

20

Joined Cardno

October 2010

Education

B.S., Geological Sciences,
University of Miami, Coral
Gables, FL

Professional Registrations

Registered Professional
Geologist (CA #7780)

Summary of Experience

Mr. Stivala has over 20 years of environmental management. He manages environmental site assessments, remedial alternative testing, and environmental support for construction and demolition projects. He is adept at negotiating environmental solutions with regulators, attorneys and clients. In his capacity as a senior environmental professional, he has managed environmental programs in the oil & gas and aviation industries. Mr. Stivala's regional experience spans California, Oregon, Washington, Florida, and Georgia.

Mr. Stivala is well-versed in the management and preparation of a range of technical reports including site investigation work plans, corrective action plans, remedial action plans, feasibility studies, site conceptual models, groundwater monitoring reports, and Phase I & II ESAs. Mr. Stivala's environmental field techniques includes drilling via hollow-stem auger, direct-push, mud rotary, air rotary, and cone penetrometer testing. He is skilled in aquifer testing media sampling. Mr. Stivala has implemented several remedial alternatives including multi-phase extraction, airsparging, bioventing, pump & treat, in situ chemical oxidation, surfactant application, and excavation.

Mr. Stivala is dedicated to protecting workers' well-being by fostering a strong culture of health and safety in the workplace. Mr. Stivala has extensive experience with behavior-based health & safety philosophies such as the Loss Prevention System. He has led near-loss investigations, performed field safety observation and feedback sessions as well as tracked company's regional use of health & safety documentation tools.

Significant Projects

- > Retail Petroleum Portfolio Management / Western U.S. From 2005 to present. Managed large portfolios for Phillips 66 Company, ConocoPhillips, ExxonMobil, and Chevron Environmental Management Company sites. Responsible for stewarding teams of project managers and scientists in the assessment and remediation of petroleum-impacted sites of varying sizes. Personally managed portfolio of over 40 projects at a time. Sites consist of bulk fuel terminals and service stations. Implemented assessment technologies, such as Membrane Interface Probe, Rapid Optical Screening Tool, and Ultraviolet Induced Fluorescence. Managed implementation of remedial alternatives including multi-phase extraction, air sparging, bio sparging, in situ chemical oxidation, and surfactant application. Presented remedial action plans to Chevron's in-house remediation review team. Versed in Chevron's Incident Reporting Protocol and have led Loss Prevention System (LPS) Near Loss Investigations, prepared Loss Prevention Observations, and led feedback sessions. Tracked company's regional use of LPS tools.
- > Airport Facility Site Assessment & Remediation / Nationwide. Managed large-scale contamination assessment and remediation projects at San Francisco, Oakland, Sacramento and Miami Airports from 1991 to 2008.

Contaminants included petroleum, chlorinated solvents, and metals. Performed jet fuel bulk storage facilities assessments at San Francisco and Oakland International Airports. Major clients include United Airlines, SFO Fuel, PS Trading, and Dade County Aviation Department. Interfaced with airport and regulatory agency officials. Coordinated “air-side” activities under expedited schedules. Performed fuel-hydrant line closures and provided environmental support for airport facilities modification projects.

- > Fractured Bedrock Investigation / San Francisco Airport. Field manager for bedrock drilling project. Supervised drilling of multilevel monitoring wells up to 500 feet deep into fractured bedrock as part of a chlorinated solvent assessment. Down-hole geophysical logging was performed to identify fracture zones. Logging included caliper, resistivity, gamma, and video logging. Wells were drilled using a mud and air rotary rig.
- > Aviation Fuel Storage Facilities Demolitions / San Francisco, Oakland Airports and Sacramento. Program manager for the decommissioning of aviation fuel distribution facilities. Orchestrated demolition of bulk jet fuel storage tank facilities and subsequent assessment and remediation. Negotiated with regulatory authorities and outside consultants. Remediation at San Francisco International Airport included excavation and in situ chemical oxidation. One project included a large excavation of soil impacted with jet fuel and PCBs.
- > Former Solvent Packaging Facility Remediation, Union City, CA. Maintained a large groundwater/soil remediation system located at a former solvent packaging facility. Chlorinated solvent contamination from the facility extended a quarter mile offsite and was captured using 22 groundwater extraction wells pumping from two separate aquifers. Air treatment was performed using a resin absorption unit.
- > Railroad Facilities Assessment and remediation/ Western United States. Managed environmental site assessment projects at Union Pacific Railroad sites in California and Oregon. Projects consisted of assessments of petroleum, solvents, metals, and pesticides contamination.

- > OSHA 40-Hour Hazardous Waste Operations Training
- > OSHA 8-Hour Hazardous Waste Operations Supervisor Training
- > Loss Prevention System (LPS) Training
- > BATC Refinery Safety Training

Training

Destiny S. Hazra, M.A.

Current Position

Senior Scientist

Profession

Environmental Assessment

Years' Experience

8

Joined Cardno

June 2012

Education

M.A., Marine Affairs and
Policy, University of Miami

B.S., Biology, Wofford College

Affiliations

American Planning
Association (APA), Florida
Chapter

Professional Planner in
Training

Environmental Professional in
Training

Summary of Experience

Ms. Hazra is responsible for conducting Phase I Environmental Site Assessments and Environmental Assessments in accordance with ASTM E 1527-05 and the National Environmental Policy Act. Ms. Hazra also performs various phases of biological and environmental field investigations, environmental permitting and data analysis related to the preparation of technical reports in accordance with the NEPA.

Significant Projects

- > **Phase I Environmental Site Assessments:** Conducts Environmental Assessments for major financial loan institutions and national clients in accordance with client-specific and/or ASTM protocols. Specific activities performed included site inspections; title searches; historical aerial photograph analyses; topographic and geologic map analyses; federal, state and local agency file reviews; and technical report preparation.
- > **National Environmental Policy Act (NEPA) Consultant:** Conducts various phases of biological and environmental field investigations and data analysis related to the preparation of technical reports in accordance with NEPA. Current projects involve Environmental Planning to provide technical guidance, environmental documentation, regulatory permitting and agency coordination for an informed decision-making process related to Capital Improvement projects. Projects involve sustainable development/design to ensure environmental issues such as noise and vibration, air quality, critical habitat, hazardous wastes, soil and water quality are considered and these implications are balanced between society and stakeholders.
- > **Environmental Site Assessments, City of Miami, Department of Economic Development:** Performed large scale environmental assessment for the City of Miami/Department of Economic Development. Project included large tracts of developed land encompassing several city blocks (800+ properties) with detailed historical and regulatory summaries, site reconnaissance information, and recommendations for additional assessment, as warranted. Data was managed in MS Access database to allow for use of data in GIS analysis.
- > **Transaction Screening Reports:** Performs Transaction Screenings of commercial, industrial, retail, and telecommunications facilities in accordance with ASTM E 1527-05.
- > **National Environmental Policy Act (NEPA) Reviews:** Conducts Environmental Site Assessments, NEPA compliance studies, Biological Assessments, environmental permitting and additional NEPA requirements under the State Historic Preservation Office (SHPO) and Tribal Historic Preservation Office (THPO).
- > **Faunal Density and Community Composition of the Nearshore Zone for the Florida Comprehensive Everglades Restoration Project:** Managed and expedited all biological data sampling, identification of species, data processing, publishing reports. In addition, performed GIS and data acquisitions for a National Geodetic Survey (NGS)-sponsored Shallow Water Positioning System (SWaPS) Project mapping nearshore benthic habitats in Biscayne Bay, Florida. Coordinated the GIS-based field data acquisition of continuous high-resolution photographic data to monitor benthic habitats, assisted with the spatial analysis and correlative statistics for processed field data, and published results in a peer-reviewed journals.

Audrey Krompholz, CAC

Current Position

Due Diligence Services
Manager

Profession

Due Diligence Services
Manager

Years' Experience

8

Joined Cardno

March 2005

Education

B.S., Environmental Science
with a Biological Emphasis,
University of California,
Berkeley, CA, 2004

Professional Certifications

Certified Asbestos Consultant,
State of California, Division of
Occupational Safety and
Health (CA, #09-4483, 2009)

Summary of Experience

Ms. Krompholz has experience performing and managing Phase I Environmental Site Assessments (ESAs), Transaction Screen Assessments (TSAs), Property Condition Assessments (PCAs), and industrial hygiene investigations. She develops report templates in support of due diligence and industrial hygiene service lines. Ms. Krompholz is responsible for leading staff scientists, industrial hygienists, project managers, field technicians, and subcontractors, as well as coordinating large-scale microbial remediation oversight contracts.

Significant Projects

- > **Modified Environmental Site Assessments and FCC-Required Environmental Compliance Studies / Telecommunications Sector / California and Nevada.** Performed and managed over 200 Modified Phase I ESAs or FCC-required environmental compliance studies in support of telecommunication service expansion and antenna placement.
- > **Environmental Site Assessments / Agricultural, Residential, Commercial, Industrial, and Government Sectors / Northern California.** Performed and managed ASTM-compliant ESAs in support of pending real estate transactions. Completed a Phase I ESA for a 12.9-acre site in San Rafael that was previously utilized as a manufactured gas plant, corporation yard, and gasoline service station; each of the prior uses had contributed to onsite contamination which required further action. Performed a Phase I ESA of a 123-acre site in Salinas which was previously utilized as a tire-manufacturing plant and was delisted from the National Priority List.
- > **Transaction Screen Assessments / Education, Residential, Commercial, and Industrial Sectors / Northern California.** Performed and managed ASTM-compliant TSAs and developed a report template that complies with the revised ASTM standard and current SBA guidelines.
- > **Property Condition Assessments / Residential, Commercial, and Industrial Sectors / Northern California.** Performed PCAs to include observation and report of the physical condition and maintenance of a property and its improvements. PCA reports addressed items significant for the continued operation of a facility in its current usage and occupancy, consistent with comparable properties of similar age. One PCA included an assessment of a 44-acre marina in Alameda which contained 10 piers, 530 berths, and approximately 37 buildings constructed between the early 1900's and 1984.
- > **Combustible Materials Assessment / Data Center / San Jose, CA.** Developed a scope of work/report template and completed the combustible materials assessment. The report was well-received by City of San Jose Fire Department staff who commented on its thoroughness and accuracy.

- > **Indoor Air Quality, Odor, and Microbial Investigations / Education, Residential, Commercial Industrial, and Government Sectors / Northern California.** Performed indoor air quality, odor, and microbial investigations at numerous site buildings and campuses throughout the San Francisco Bay Area. Investigations included visual inspections, HVAC inspections, collection of indoor air quality measurements, bulk and/or air sample collection, interpretation of findings and analytical results, report preparation, and site-specific remediation strategies.
 - > **Asbestos, Lead, and Dust Air Monitoring / Construction, Education, Residential, Commercial, and Industrial Sectors / Northern California.** Conducted air monitoring and oversight of construction, emergency spill/release cleanup, or abatement activities. Directed subcontractors and responded to emergency situations in adherence with the established scope of work. Recommended scope modifications in response to tenant concerns. Represented the environmental consulting company at regularly scheduled board meetings regarding abatement status.
 - > **Limited, Comprehensive, and Demolition ACM Surveys / Education, Residential, Commercial, and Industrial Sectors / Northern California and Oregon.** Identified, quantified and sampled suspect asbestos-containing materials (ACMs). Interpreted laboratory analytical data and provided recommendations to the client, in report format, for ACM management procedures.
 - > **AHERA Surveys / Education Sector / Northern California.** Re-inspected asbestos-containing building materials within multiple district campuses according to AHERA protocol. Photographed areas of concern and provided recommendations to clients, in report format, for ACM management procedures.
 - > **Spill Prevention, Control, and Countermeasure (SPCC) Plan / Data Center / San Francisco, CA.** Completed an SPCC plan for a light industrial data center with several backup generators and aboveground storage tanks.
 - > **Groundwater Monitoring / Commercial and Industrial Sectors / Northern California.** Performed groundwater monitoring activities in accordance with scheduled monitoring events designed to evaluate groundwater contamination at petroleum service stations and industrial facilities.
-
- > OSHA 40-Hour Hazardous Waste Operations Training and Refresher (CA, 2010)
 - > 16-Hour Microbial Investigations, Assessments and Remediation in the Indoor Environmental Training Course conducted by ATC (CA, 2008)
 - > Medic First Aid and CPR Training (CA, 2009)
-
- > Commercial Real Estate Women, East Bay Chapter
 - > National Association of Industrial and Office Properties, Associate Member 189425
 - > The Environmental Information Association, Member

PUBLIC RECORDS ACT REQUEST DATED: 10/15/13FAX

SUBJECT(S): 21195 CENTER ST., CASTRO VALLEY, VA 94546

PRAR #: 02-10-15-13-11

Dear Ms. Hazra:

We have received your Public Records Act Request for information from the Department of Toxic Substances Control.

After a thorough review of our files we have found that no such records exist at this office pertaining to the site(s) referenced above.

If you have any questions regarding this request, or require information for additional sites, please direct your inquiries to the numbers provided below.

Thanks and regards,

Comments:

I sent you an email and have yet to receive a response. Please check your email folders.

We received your fax. We do show CUPA hazmat records for the following address:
21195 Center Street, Castro Valley

I have availability this Thursday 10/24 10am
I will schedule you for this time unless communicated otherwise.
Please reply if this time works best for you.
510-567-6809

Thank you,

Please consider using our new CUPA File review system online.
This is a more efficient practice we are trying to adopt.
For future File Review inquiries please visit us online at
<http://www.acgov.org/aceh/hazard/cupa-file-review-request.htm>

Additional Notes:

Dear Personnel

Cardno ATC is conducting environmental site assessments and would like to review files for the following addresses:

21185 Center Street, Castro Valley, CA 94548

If you have any incident of fire, hazardous materials, and/or storage tank files for the above listed sites, please contact me as soon as possible to set up the earliest available appointment for a file review. I appreciate your prompt attention to this matter. If you have any questions, please feel free to contact me.

Thank you,

Cardno ATC

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
 Web Soil Survey URL: <http://websoilsurvey.nrcs.usda.gov>
 Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Alameda County, California, Western Part
 Survey Area Data: Version 7, Jul 27, 2010

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 12, 2010—Sep 17, 2011

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

CALTRANS HAYWARD MAINTENANCE STATION
21195 Center Street
Castro Valley, California

Dear Ms. Leech,

At your request, I have attached two copies of site maps originally provided to me by you. Locations of the three vapor wells (VW1-VW3) and the single groundwater monitoring well (MW1) are shown on the two maps and correspond with the wells destroyed. I have also attached a copy of the approved drilling permit application from Zone 7 Water Agency.

If you have any questions, please do not hesitate to contact me.

CALTRANS HAYWARD MAINTENANCE STATION
21195 Center Street
Hayward, California**

Dear Ms. Leech,

In accordance with our telephone conversation of May 20, 1997, I am writing to inform you that we have completed the abandonment of four monitoring wells at the above referenced site.

The work was completed on Thursday, May 22, 1997 and included complete overdrill of three two-inch diameter, 35 foot deep wells, and one four-inch diameter, 40 foot deep well. Once each well was overdrilled, a tremmie system was used to fill the wells to the surface with cement grout. The tops of each well were capped with ready mix concrete to avoid trip hazards and provide strength to support traffic. All work was completed in accordance with the Alameda County Flood Control and Water Conservation District, Zone 7 Water Resource Management Department requirements.

If you have any questions, please do not hesitate to contact me.

Sacramento Ca 95814

Dear Mr. Lopez:

Subject: Fuel Leak Site Case Closure - Caltrans, 21195 Center St., Castro Valley CA 94546

This letter transmits the enclosed underground storage tank (UST) case closure letter in accordance with Chapter 6.75 (Article 4, Section 225299.37[h]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, Alameda County, Division of Environmental Health Local Oversight Program is required to use this case closure letter for all UST leak sites. We are also transmitting to you the enclosed case closure summary. These documents confirm the completion of the investigation and cleanup of the reported release(s) at the subject site.

Site Investigation and Cleanup Summary

Please be advised that the following conditions exist at the site:

- 54 parts per million (ppm) Total Petroleum Hydrocarbons (TPH) as gasoline, 3.74 ppm TPH as diesel, 0.58 ppm ethylbenzene, and 0.226 ppm xylene remain in soil in the vicinity of the former UST pit and dispenser area.
- 1.9 parts per billion (ppb) benzene, 3.1 ppb toluene, 1.3 ppb ethylbenzene, and 6.9 ppb xylenes were detected in March 1996 in groundwater.

If you have any questions, please contact this office at (510)567-6700.

Sincerely,

Amy Leech
Hazardous Materials Specialist

RE: UNDERGROUND STORAGE TANK (UST) CASE
(1-1,000 gallon gasoline and 1-260 gallon diesel tank)
Caltrans located at 21195 Center St., Castro Valley CA 94596
SITE ID #3062

Dear Mr. Lopez:

This letter confirms the completion of a site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground tank release is required.

This notice is issued pursuant to a regulation contained in Title 23, Section 2721(e) of the California Code of Regulations.

Please contact our office if you have any questions regarding this matter.

Sincerely,

Mee Ling Tung, Director

Date Submitted to RB:

RWQCB Staff Name: Kevin Graves, P.E.

Title: Assoc. Water Resources Control Engineer

RB Response: *Approved*

Signature: *Kevin Graves*

Date: 10-18-96

VII. ADDITIONAL COMMENTS

On January 18, 1989, two USTs (one 1,000-gallon gasoline UST and one 260-gallon diesel UST) were reportedly removed from the Caltrans Hayward Maintenance Yard located at 21195 Center Street in Castro Valley, California. (See attachment 1 for site location.) Three soil samples were collected during tank removal activities; analytical results identified 1.7 ppm TPH-G, 2,100 ppm TPH-D, and non-detect for BTEX.

Subsequent to the UST removals and during investigations conducted in January 1990 and February 1991, 14 soil borings (SB1 - SB6 and B1 - B8) were emplaced in the vicinity of the former UST pit and dispenser area to assess the vertical and lateral extent of soil contamination. Soil contamination was determined to be laterally located within a forty foot radius from the fuel dispensing area and vertically to approximately 35 feet bgs. (See attachment 2 for boring locations and results.) In addition to the eight soil borings installed in 2/91, one groundwater monitoring well (MW-1) was installed near the southeastern extent of the contaminant plume. Boring and construction logs are not available for this well; however, groundwater was sampled and analyzed for TPH, BTEX, and HVOCs. All results were unremarkable.

Overexcavation of approximately 391 tons of contaminated soil was completed in the vicinity of the former USTs and dispensing area during September 1992. The excavation extended laterally approximately 30 ft. and vertically to approximately 35 ft. bgs. Confirmatory results of soil samples collected at the excavation perimeter identified 54 ppm TPH-G, 3.74 ppm TPH-D, and ND to trace concentrations of BTEX. (See attachment 3 for sample locations and results.)

Three additional monitoring wells (VW-1, VW-2, and VW-3) were installed on 09/28/92 to assess if groundwater at this site had been adversely impacted by petroleum hydrocarbons (PHs). (See attachment 4 for boring/well completion logs.) Soil samples were apparently not analyzed for PHs. Groundwater from VW-1 through VW-3 was monitored and sampled five times from 10/94 to 3/96. Groundwater samples were non-detect for TPH-G, TPH-D, and BTEX during all five sampling events, except for low levels of BTEX detected during the last quarter of sampling in 03/96. (See attachment 5 for MW locations and historical results.)

No further investigations are recommended at this site since adequate soil removal was achieved and residual concentrations of petroleum hydrocarbons detected in soil and groundwater do not appear to be a significant risk to human health or the environment.

APPENDIX M
TERMINOLOGY

TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-05. The Standard Practice should be referenced for further detail (such as the precise wording), related definitions or additional explanation regarding the meaning of terms.

recognized environmental condition(s) (REC) - the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a *material threat* of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, ground water, or surface water of the *property*. The term includes *hazardous substances* or *petroleum products* even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions.

de minimis conditions – are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not *recognized environmental conditions*.

historical recognized environmental condition(s) (HREC) - environmental condition which in the past would have been considered a *recognized environmental condition*, but which may or may not be considered a *recognized environmental condition* currently. The final decision rests with the *environmental professional* and will be influenced by the current impact of the *historical recognized environmental condition* on the *property*. If a past release of any *hazardous substances* or *petroleum products* has occurred in connection with the property and has been remediated, with such remediation accepted by the responsible regulatory agency (for example, as evidenced by the issuance of a no further action letter or equivalent), this condition shall be considered a *historical recognized environmental condition*.

material threat – a physically observable or *obvious* threat which is reasonably likely to lead to a release that, in the opinion of the *environmental professional*, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a *hazardous substance* and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

threat to human health or the environment – a substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a *material threat* of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, ground water, or surface water of the *property*. An example might include a release of a *hazardous substance* in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or substantial damage to natural resources. The risk of that exposure or damage would represent a threat to human health or the environment.

generally would not be the subject of an enforcement action – the likelihood that an environmental condition would not be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be less likely than not, then the condition is considered to be generally not the likely the subject of an enforcement action.

RE: 21195 CENTER STREET, CASTRO VALLEY

Hayward
California
94544

Dear Mr. Lightfoot:

phone
510.670.5400
fax
510.785.8793

I have reviewed your demolition request made on behalf of the Alameda County Community Development Agency per the guidelines of the California Environmental Quality Act and have found that the structures located at 21195 Center Street are not "historical resources." Therefore, the proposed demolition would not cause a substantial adverse change to any historical resource, and no further analysis is required.

RE: DEMOLITION REQUEST FOR 21195 CENTER STREET, CASTRO VALLEY

Summary

The purpose of this report is to describe the findings of staff's analysis of the demolition request for a warehouse and house located at 21195 Center Street, Castro Valley, CA. Staff has conducted a review of the demolition request submitted for 21195 Center Street, (APN 084C-0650-001-03) in accordance with the California Environmental Quality Act (CEQA) and has found that demolition of the buildings located at 21195 Center Street would not cause a substantial adverse change in the significance of a historical resource as defined in Section 15064.5 of the CEQA Guidelines. It is my opinion that the demolition permit for 21195 Center Street shall require no further historical review.

Discussion

The subject property contains a warehouse and house for which a demolition permit is requested, and various outbuildings that are not included in this assessment. Until 2014, the California Department of Transportation (Caltrans) used the property as a maintenance yard. Property descriptions attached to the deed indicate that the bulk of the subject property, approximately one acre, was acquired by the State of California in 1925; and the remaining one-quarter acre portion was acquired in 1937. These two parcels were subsequently merged to form the existing 1.25 acre parcel. As a result of long-term ownership by the state, records that indicate the age of the two buildings are not available. A document search by the Hayward Area Historical Society produced an aerial photograph from 1939 that shows the two buildings in their current locations; however, the exact date of their construction could not be determined.

The one-story warehouse is approximately 4,100 square feet; and consists of wood frame construction with metal siding and roof. The windows have wood frames and the foundation is concrete. The building is industrial in appearance with few architectural details. The elevation facing the street is a solid blank wall with the exception of a door and two small windows toward the south end. The elevation facing away from the street consists primarily of a row of covered parking bays which make up approximately half of the square footage of the building.

The one-story, two-bedroom house is located to the south of the warehouse. While it appears that the original purpose of the building was to serve as a residence, Caltrans used it as a workshop and office space in conjunction with the maintenance yard for many years. The house is of wood frame construction, with horizontal wood siding, double-hung wood frame windows, and a conventional red brick chimney. The gable roof is covered with composite shingles and the foundation is concrete. The house has few architectural details and does not represent any distinct architectural style.

Description of the Area

The subject property is located on the northwest corner of the intersection of Center Street and Castro Valley Boulevard. To the north of the subject property, Center Street is developed with multi-family and single-family dwellings. Along Castro Valley Boulevard, to the east and west of the subject property, there is a mix of uses which includes multi-family housing, mobile home parks, and commercial uses. Interstate 580 is located across Castro Valley Boulevard, to the south of the property. The construction

dates for properties within a quarter mile radius of the subject location range from 1908 to 2010.

Analysis of Supporting Documents

Chain of Title

Staff reviewed the deed documents pertaining to the property. As they are not an official chain of title certified by a title insurance company, there is no assurance that this list is complete or accurate. However, staff performed a cursory name search on each of the listed owners that did not yield any results, although an analysis performed by qualified historian would be definitive.

Historic Resources Surveys

The property has not been identified on any prior survey conducted by the County. In addition, the Alameda County Parks, Recreation and Historical Commission (PRHC) has not identified any of the structures on the property as being potentially significant.

Key Findings

The structures in question are not historical resources based on the following criteria:

- They are not listed in, or determined to be eligible by the State Historical Resources Commission, for listing in the California Register of Historical Resources (Pub. Res. Code §5024.1, Title 14 CCR, Section 4850 et seq.).
- They are not included in a local register of historical resources, as defined in Section 5020.1(k) of the Public Resources Code or identified as significant in an historical resource survey meeting the requirements Section 5024.1(g) of the Public Resources Code.
- The structures did not meet the criteria for listing on the California Register of Historical Resources (Pub. Res. Code, § 5024.1, Title 14 CCR, Section 4852) because they are/do not:
 - a) Associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;
 - b) Associated with the lives of persons important in our past;
 - c) Embody the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or
 - d) Yield, or may be likely to yield, information important in prehistory or history.

Data Sources

In making these findings staff has relied upon the following documents and data:

- Title Information, Printed March 2016
- Draft Alameda County Register of Historic Resources, October 2007
- Photos of 21195 Center Street supplied by the applicant
- Site plan supplied by the applicant
- The Alameda County Assessor's Office: CD-Data, Database

Conclusion

The building's lack of association with significant persons or events does not appear to make this property eligible for preservation. Thus, staff does not recommend that this item be forwarded to the PRHC for further consideration. However, staff recommends that the County continue to monitor demolition activity of older structures as structures of this vintage, size and type, regardless of condition, will become even rarer as the demand for land increases.

AA Series Silencers

AA Series silencers have excellent noise reducing characteristics with minimal resistance to air flow. AA Series silencers are one third smaller than comparable products, providing considerable space savings. The large surface of the felt element resists contamination far more than other materials such as sintered bronze, steel mesh or porous polyethylene.

Features:

- Compact
- Lightweight
- Durable
- 4 Thread sizes 1/8, 1/4, 3/8, 1/2
- Closed-end silencer

Benefits:

- Maximize performance – silences pneumatic equipment without back pressure.
- Increase productivity and operator safety – reduces irritating noise, improves working environment
- Closed-end silencer – contaminants can't escape
 - ~ maintains clean environment
 - ~ reduces maintenance costs
 - ~ increases equipment life

Model #		Dimensions						Weight	Construction				Noise Level

AA8	in.	1/2	0.41	1.74	1.86	0.62	0.96	0.4 oz					
	mm.												[10.4]

*Fits NPT, BSPP and BSPT threads.

AA Series Silencers Operating Specifications:

Max. Operating Pressure: Not to exceed 150 PSI [10 bar]

Noise level: Measured 4.5 ft on the diagonal from the silencer while attached to a Vaccon pump. Noise levels will vary on Vaccon and non-Vaccon products.

Note 1: Vaccon strongly recommends the use of silencers on all vacuum pumps.

Note 2: Vaccon silencers are used on all types of pneumatic devices such as air-operated vacuum pumps, air motors, valves, cylinders and more.

How to Specify:

- **For Silencer only:** Order by Model #.
- **Vaccon pump/silencer combinations:** Vaccon pumps include a silencer(s) that has been sized to ensure maximum pump performance. See specific pump for silencer options.
- **Non-Vaccon pneumatic devices:** The thread size on the exhaust port of the pneumatic device determines the size of the silencer.
- Equipment and applications may vary. Consult factory for proper silencer selection.

ST Series Silencers

ST Silencers - male and female threads

VDF 250-ST4A-2

Features:

- Straight-through design
- Felt liner provides low frequency sound
- Male and female connections
- 18 models

Benefits:

- Reliable – straight through design – non-clogging
- Maximize performance – silences pneumatic equipment without back pressure
- Increase productivity and operator safety
- Reduces irritating noise, improves working environment
- Increase savings – reduces maintenance costs, increases equipment life

The ST Series Silencers are designed with a straight through flow path that eliminates clogging by allowing the contaminants to pass directly through the silencer. Each silencer is tuned in proportion to its exhaust flow to minimize noise.

As air passes through the silencer, the dense felt element absorbs the noise, thus reducing high pitch exhaust noise to a gentle, low frequency sound. Even in the most adverse conditions, contaminants pass through the silencer making the ST Series ideal for silencing vacuum pumps that are continuously ingesting dirt and debris.

ST Series Silencers: Female Threads

STAA Series Silencers

Features:

- Compact
- Lightweight
- Durable
- Ultra quiet operation
- 2 Thread sizes 1/4, 3/8 NPT

Benefits:

- Maximize performance – silences pneumatic equipment without back pressure.
- Increase productivity and operator safety
- Reduces irritating high pitch frequency noise
- Improves working environment
- Maintain clean environment – reduces maintenance costs, increases equipment life

A hybrid silencer that offers increased noise reduction by combining an ST silencer with an AA silencer. The (closed-end) AA silencer is attached to the end of a modified ST silencer, thus removing the flow through feature of the standard ST Series silencers.

Model #		Dimensions					Weight	Construction				Noise Level

FA-51 Series Silencers

The FA-51 Series silencers offer remarkable noise reduction for high volume exhaust applications without causing back pressure. These silencers are ideal for quieting large air valves that must exhaust quickly to maintain high cycle rates. Vaccon uses the FA-51 silencers on all high flow venturi vacuum pumps where even a small amount of back pressure would decrease performance.

Features:

- Closed-end
- 3 Thread sizes 1/4, 3/8, 1/2
- Replacement elements available

Benefits:

- Safe – closed-end high flows won't cause potentially dangerous projectiles
- Quiets large vacuum pumps, valves, cylinders, air motors, and more
- Durable – more area inside to absorb sound and debris
- Economical – lasts longer, lower cost, replacement elements available
- Reliable – no back pressure on high flow applications
- Maintain clean environment – reduces maintenance costs, increases equipment life

Model #		Dimensions				Weight	Construction				Noise Level
		A	B	C	D		Body	Baffle	Screen	Element	
FA-51-1/4	in.	1/4	0.30	5.74	3.36	12.7 oz	Steel	Foam	Steel	Paper	72dB
	mm.	NPS M	7.6								
FA-51-3/8	in.	3/8	0.38	[145.8]	[85.3]	[357g]					
	mm.	NPS M	9.6								
FA-51-1/2	in.	1/2	0.38								
	mm.	NPS M	9.6								
RF-51	in.	N/A	N/A	4.76	3.03	6.2 oz					
	mm.	N/A	N/A	120.9	77.0	176g					

FA-51 Series Silencers Operating Specifications:

Max. Operating Pressure: Not to exceed 150 PSI [10 bar]

Noise level: Measured 4.5 ft on the diagonal from the silencer while attached to a Vaccon pump. Noise levels will vary on Vaccon and non-Vaccon products.

Note 1: Vaccon strongly recommends the use of silencers on all vacuum pumps.

Note 2: Vaccon silencers are used on all types of pneumatic devices i.e. air-operated vacuum pumps, air motors, valves, cylinders and more.

How to Specify:

- **For Silencer only:** Order by Model #.
- **Vaccon pump/silencer combinations:** Vaccon pumps include a silencer(s) that has been sized to ensure maximum pump performance. See specific pump for silencer options.
- **Non-Vaccon pneumatic devices:** The thread size (1/4, 3/8, 1/2) on the exhaust port of the pneumatic device determines the size of the silencer i.e. FA-51-1/4
- **P/N: RF-51 - Replacement Element:** Fits all FA-51 models
- Equipment and applications may vary. Consult factory for proper silencer selection.

AB 52 Consultation Correspondence

October 29, 2018

Amah Mutsun Tribal Band of Mission San Juan Bautista
Irenne Zwierlein, Chairperson
789 Canada Road
Woodside, CA 94062

Timothy McGowan
President

Subject: AB 52 Consultation, Castro Valley Sanitary District Corporate Yard Project, Castro Valley, Alameda County, California

Daniel M. Akagi
President Pro Tem

Dear Chairperson Zwierlein:

Dave Sadoff
Secretary

The Castro Valley Sanitary District (CVSan) is preparing an Initial Study/Mitigated Negative Declaration (ISMND) for the proposed CVSan Corporate Yard Project, located at 21195 Center St., Castro Valley, CA 94546. The proposed project is subject to the California Environmental Quality Act (CEQA). The proposed project involves the demolition of existing on-site structures and development of a new corporate yard facility. The corporate yard facility would include an approximately 13,140 square-foot, two-story building that would provide office space and other facilities such as equipment storage, conference rooms, amenities for employees (i.e.: kitchen, break room, shower, and lockers), and a public counter for the CVSan Engineering Department. The project would also include vehicle maintenance facilities, a workshop, materials storage areas in the same corporate yard building, and an associated surface parking lot. The plans would also include a separate hazardous material building to house chemical products, such as paint and emergency fuel.

Ralph Johnson
Secretary Pro Tem

Melody Appleton
Board Member

Roland P. Williams, Jr.
General Manager

The proposed project must comply with California Public Resources Code § 21080.3.1 (Assembly Bill [AB] 52 of 2014), which requires local governments to conduct meaningful consultation with California Native American tribes that have requested to be notified by lead agencies of proposed projects in the geographic area with which the tribe is traditionally and culturally affiliated. The input of the Amah Mutsun Tribal Band of Mission San Juan Bautista is important to the CVSan's planning process. Under AB 52, you have 30 days from receipt of this letter to respond in writing, if you wish you consult on the proposed project. If you require any additional information or have any questions, please contact me at (510) 537-0757 or via e-mail at landon@cvsan.org. Thank you for your assistance.
