

# THE NO FOOD WASTED HIERARCHY

**Prevent Wasted Food**

Preventing wasted food in the first place has the biggest impact.

**Food to People**

Extra food can be donated to local food banks, pantries, community dining rooms, etc.

**Food to Animals**

Food that isn't edible for people can many times be fed to animals.

**Food Recycling**

Food scraps and used cooking oil can be recycled into new products.

**Compost**

Composting food scraps provides a rich soil amendment to improve our soils.
